### **3. STANDING ITEMS**

#### **a) IT Update**

V. Sokha reported on the following major projects undertaken by IT:

- Printer Replacement Project – On September 18, 2017, IT started the first phase of installing new Ricoh multifunctional devices (MFDs) to replace all Canon devices on campus for employees. The second phase will replace most other printers on campus including student and department printers. With the new Ricoh MFDs, employees will be able to pick up a print job from any accessible MFD on campus. Council members were encouraged to visit the project website (<https://langara.ca/information-technology/projects/printer-replacement-project.html>) to learn more about this project and the installation and outage schedule, and sign up for a training session.
- Enterprise Resource Planning (ERP) Renewal Project – An ERP Task Force was established during the summer to lead and drive forward the procurement process for selecting and acquiring a new ERP system for the College. Also over the summer, KPMG was retained to create a list of our business requirements for the new ERP system. To help develop the Request for Proposal (RFP) for the ERP, several ERP workshops will be set up with involved department leads to go through and finalize our business requirements. The final draft RFP will be presented to the Board at its meeting in November 2017.

Discussions ensued and members' questions were answered.

At the request of L. Trotter, V. Sokha briefed the Council on a recent phishing scam attack that happened at MacEwan University resulting in a transfer of \$11.8M from the University to scammers. As a result of this fraud case, and other similar attacks that happened to many other Canadian companies, the College has reviewed its internal control procedures to ensure the College will not become a victim of this type of fraud attack.
